

Waterless Blue Barrier

Ultimate Solutions

- Pleasant fragrance eliminates the need for deodorizers
- Most commercial cleaning agents do not affect this product
- Won't dissolve, mix or react chemically with urine
- Over 95% biodegradable
- Zero evaporation at 100° F and does not freeze above -70° F. The non-freezing feature allows facilities to eliminate or reduce urinal winterization costs
- This is a green product

**Lasts up to
1000 Sanitary Uses!**

How Blue Barrier Works:

The urine passes through a floating layer of the Ultimate Solutions Waterless Blue Barrier liquid, which forms a barrier that prevents sewer vapors from escaping to the restroom atmosphere. Urine under the barrier layer overflows into the central tube and runs down to the conventional drain line. The layer of approximately 3 ounces of Blue Barrier will last for about 1000 sanitary uses. The liquid is then simply replenished. Task time: 20 seconds. Trap does not need to be touched.

The Ultimate Waterless Urinal Solution!

- ✓ long lasting
- ✓ biodegradable
- ✓ minimizes waste
- ✓ non-freezing

Waterless Blue Barrier is simply and accurately measured into prescribed increments by squeezing the quart bottle and filling the portion aid on top. The resulting 3 ounce portion is then poured directly into the holes of the urinal trap. Using the portion aid minimizes the waste of Blue Barrier.
